Russian

English

## Experience

### SmartCode

Front end web development course

Completed a 9-month course in web development. Skilled in HTML and CSS for web structure and style. Creating interactive websites using JavaScript and React JS library. Learned to make websites work well on all devices. Familiar with Git and GitHub for version control.

### Full Learning

Completed a two-month web development internship, gaining hands-on experience with JavaScript and React JS at Full Learning

### Projects and Works

#### JavaScript project

A React.js application for managing tasks with advanced categorization features. The app allows users to organize tasks by importance and status, with all data saved in localStorage

[GitHub Link](#)

#### React JS project

Developed an admin interface for a digital menu management system allowing chefs and baristas to add, edit, delete, and manage products like beverages, desserts, and other menu items. Inspired by e-commerce functionalities, the system provides real-time cost calculations based on ingredient prices stored in a JSON file.
